

## **Jeffry Wainwright**

**Principal Software Engineer @ [Lokker.com](#)**

Santa Monica, CA, June 2025-current

[yowainwright@gmail.com](mailto:yowainwright@gmail.com) | [jeffry.in](http://jeffry.in) | [LinkedIn](#) | [GitHub](#)

I've been building and maintaining tools to make life a little easier for 15+ years with extensive experience in JavaScript/TypeScript. I do moonlight with Go, Python, and Kubernetes; always looking to learn more!

## **Professional Experience**

### **Lokker | Santa Monica, CA**

*Principal Software Engineer | June 2025-current*

- Rebuilt Lokker's [Privacy Insights product](#), think DataDog for privacy, using TypeScript, React, Fastify, Bun, and Claude
- Refactored [Guardian](#), a 3rd-party script sanitizer, to be more performant and scalable using TypeScript and Cloudflare workers
- Built out observability with Prometheus and Grafana to track product health

### **GoodRx | Santa Monica, CA**

*Senior Software Engineer II | December 2021-June 2025*

- Kept the dev lifecycle alive by maintaining [Lifecycle](#), [GoodRx's ephemeral environment tool](#), supporting hundreds of deploys and developers a day in TypeScript, Node.js, Docker, Kubernetes, and AWS.
- Built an automated scripting tool for executing security and privacy monitoring scripts using Node, AWS Lambda, and a little React app to ensure it's working.
- Implemented and maintained key chunks of GoodRx's [global opt-out](#) architecture using Go and TypeScript with GraphQL and gRPC protocols, enabling customers to privately manage their data.

### **Komodo Health | Los Angeles, CA**

*Senior Software Engineer | June 2021-December 2021*

- Developed low-code software to help healthcare professionals map data into usable results and infographics using TypeScript, React, and Python.

### **Currency | Santa Monica, CA**

*Senior Software Engineer/Engineering Manager | February 2020-June 2021*

- Built a payment platform for big-ticket online purchases.
- Set up a monorepo so that the team could collaborate better; frontend (React, TypeScript) and backend (Node.js, TypeScript) really sped up productivity.

### **Dollar Shave Club | Venice, CA**

*Frontend Engineer | March 2016-February 2020*

- Built a headless CMS; helped streamline CI/CD.
- Set up content infrastructure that made deploys less painful.
- Built a dynamic, internationalized landing page system.
- Released and maintained a bunch of fun open-source products while there: [stickybits](#), [shave](#), [reframe.js](#), and more.

## **Open Source**

- Current/previous core member of [Koajs](#) and [JSPM](#)
- Maintain [ES Check](#), [Stickybits](#), [Shave](#), [Reframe.js](#), [scrolldir](#), and more.

## **Education**

- [University of Wisconsin-Madison](#) | BS in Art
